Zsolt Horváth

Budapest | GitHub | LinkedIn | hrvth.7slt@gmail.com

Software Engineer with 10+ years of experience building with PHP, Python, and TypeScript. Worked on a wide range of projects, from legacy monoliths to microservices, in high-traffic environments where reliability and availability are essential. I enjoy working in teams, sharing knowledge, and making a positive impact.

Career

- Jan 2026 - Sep 2026 - **Senior Software Engineer** at **Recart**
  - Expanded the integration capabilities of the company's SMS marketing and list growth platform while engineering its related microservices with **TypeScript, Node.js, MongoDB, Redis, DynamoDB**, and **Datadog**.
  - Ensured fault tolerance and high availability through event-driven messaging with **SQS** and **SNS**.
  - Launched a rapidly evolving **MCP server** to support merchants' agentic workflows.
- Jul 2024 - Jan 2026 - **Staff Software Engineer** at **Byborg Enterprises**
  - Architected new features for a legacy streaming site and its services under heavy load (~10M daily users), with a performance awareness, leveraging **Python, Flask, MySQL, Redis, Elasticsearch, Kafka**, and **Docker**.
  - Integrated an in-house recommendation engine through a cross-team effort while ensuring high availability.
  - Contributed to the introduction of new technologies and created local environments for legacy projects with **Docker**.
- Feb 2023 - Jul 2024 - **Senior Software Developer** at **Billingo**
  - Delivered e-invoicing features built with **PHP, Laravel, MySQL, Redis, Elasticsearch**, and **Docker** as the main technologies.
  - Integrated a non-blocking data synchronization pipeline with an external CRM system.
  - As part of a high-impact change affecting both the codebase and deployment, upgraded multiple framework versions and mitigated the resulting 20% CPU performance hit.
  - Monitored applications with **Grafana**, tracked errors with **Sentry**, automated deployments with **GitHub Actions**, and automated infrastructure management with **Ansible**.
- Sep 2021 - Feb 2023 - **Senior Software Developer** at **Webshippy**

    - Developed e-logistics platform and onsite software stack that included **PHP, MySQL, Redis, and Memcached**.
    - Decoupled new features into a microservices architecture using **Laravel, Kafka, and Docker**.
- Dec 2020 - Sep 2021 - **Senior Software Developer** at **Mindtech Apps**
    - Built backend REST APIs with **PHP** and **Laravel**.
    - Built backend APIs with **GraphQL**, **TypeScript** and **NestJS**.
    - Assisted the frontend team with API integrations.
- Sep 2013 - Dec 2020 - **Software Developer** at SR Limnatis Holdings Ltd
    - Developed tube sites, administration, CMS, and webmaster sites, as well as associated services, in **PHP** and **JavaScript**.
    - Refactored and rebuilt a legacy project from plain PHP to **CodeIgniter** and, years later, to **Laravel**, while supporting framework updates.
    - Scaled sites to 40M+ views per day using **MySQL** and **MongoDB**, with **Redis** as a caching layer.
    - Introduced **Elasticsearch** for searching and filtering on our tube sites.
- Feb 2013 - Sep 2013 - **Mobile Application Developer and Manual Tester** at **Appsters**
    - Composed cross-platform mobile applications (iOS, Android, Windows Phone).
    - Performed manual QA testing based on predefined test cases.

Education

- 2010 - 2012 - **Szent György Média és Informatikai Szakgimnázium** - Web Developer Qualification by National Qualification Register
